

Case Study – Life Sciences

o3 Capital acted as the sole advisor to Ocimum Biosolutions, a life sciences R&D enabling company offering full service genomics outsourcing capabilities to Life Sciences labs across the world. Ocimum focuses on BioIT which includes LIMS and Bioinformatics products and services, BioMolecules which includes Microarrays and Oligonucleotides and BioResearch services that tie the two to provide complete solutions to include both wet and dry research towards providing a consolidated analysis report.

o3 Capital assisted Ocimum in raising funds from Kubera Partners, an AIM listed US\$ 225 million fund. The funds were used by Ocimum to partly finance its organic plans as well as fund its acquisition of US based Gene Logic, which is involved in the development and commercialization of proprietary genomic and toxicgenomics database, toxicgenomics services, software tools and other services.
